

AcademicLabs is an AI-powered scientific landscaping platform that provides a comprehensive overview of early-stage research, allowing you to quickly discover who is currently working on what in the scientific community worldwide.

Find all Scientific Research and Insights through

- A Global Database of publications, citations, profile of researchers, what are they are currently researching, clinical trials, patents, target for joint grant applications, funding, Ongoing Research and projects related to your subject.
- A single platform for scientific information scattered around 100s of portals (PubMed, Google Scholar/Patents, ESPACENET, USPTO, JPO, Clinicaltrials.gov, WHO, Universities Website, Cordis, Member Directories, event participants etc) and finding insights in minutes rather than weeks.

Answer Your Specific R & D Questions with Data Driven Analytics:

- What the authors of most cited peer-reviewed publications on your topic focusing on today?
- Which research institutions are actively filing patents in your area currently?
- Which Universities and specifically who in these universities are historically most active in your target area?
- Which projects are taking place today that may lead to interesting outcomes tomorrow?
- How do I identify institutions/individuals for joint grant applications?

ALL ON ONE UNIFIED PLATFORM – ACADEMICLABS

Pictorial representation of the content coverage and benefits of AcademicLabs

AcademicLabs empower scientists, researchers, faculty and IPR professionals in making better data driven decisions, faster

Data Coverage in AcademicLabs

 Research Groups 150,526 Academic research groups at 1000+ leading universities UNIQUE DATA	 Researchers 18,347,816 Academic and industry researchers from all over the world. Includes all life science, chemistry and AI researchers with ≥3 publications, and researchers in all other disciplines with ≥10 publications	 Companies 506,123 Companies in the biotech and pharma industry. Includes emerging and established therapeutic biotech, diagnostics, medical devices, big pharma, incubators, investors, consultants, CROs, C(D)MOs, etc UNIQUE DATA
 Ongoing Research 460,248 Current lines of investigation of academic research groups, as communicated publicly UNIQUE DATA	 Funded Projects 2,972,923 Projects funded by the EU, US, Japan, most European countries, and the Wellcome Trust	 Clinical Trials 1,071,141 Clinical trials from ClinicalTrials.gov and 19 other registries worldwide covering US, EU, China, India, Japan, Republic of Korea, Australia, New Zealand, Africa, Brazil, Peru, Cuba, Thailand, Sri Lanka, Lebanon and Iran.
 Publications 94,879,343 All 37+ million PubMed publications, plus 50 million additional life science and STEM publications since 2015	 Patents 31,541,684 Patents and patent applications since 2005 including priority rights from EPO, USPTO, JPO and WO	 News 123,368 Fierce news since 2015 and PR Newswire press releases for life science organisations since 2023 NEW

Find the needle in the haystack!

AcademicLabs empower's Innovation, Research, Intelligence, R&D, Academia, Grants, Funding Agencies, and more to uncover vital information amidst the noise, saving you valuable time and effort.
